To Whom It May Concern,

I enthusiastically and explicitly recommend you invite Mrs. Kelly Narowski to speak at your next safety event.

The first time I met Kelly, I thought, "Wow, this Kelly Narowski is really something. She is genuine and there is something special about her. I need to invite her to Marine Corps Base, Camp Lejeune to speak with our Marines and Sailors." I did so, and was not disappointed!

On all of the presentation basics, Kelly receives the highest of marks, e.g. professionalism, preparedness, enthusiasm. Her delivery is both energetic and informative; there is no mistake that her message is very personal to her. The individual connection that Kelly has to the material gives her an uncanny ability to seize her audience's attention. She exhibits a tremendous amount of emotion and energy during her presentations and her use of photographs and vignettes that focus on decision making moments is not only thought provoking, but leaves a lasting impression on those in attendance. Using her personal experiences not only keeps the attention of the Marines and Sailors in the audience, but forced them to think about making better decisions in their off-duty time. Whether it is texting while driving, speeding, drinking and driving, or preventing a suicide, her message is clear: Making a hasty, poor decision may have a harmful and lasting impact on your career, your life, or the lives of your family.

I've witnessed many safety presentations over the years, Kelly Narowski's presentations, without question, are among the very best!

Sincerely,

STANLEY J. DUTKO, JR.
Director of Safety
Marine Corps Installations East
and
Marine Corps Base, Camp Lejeune
Building 58, Virginia Dare Drive
